SUMMARY

Full-stack web developer and graduating BSIT student at Holy Angel University who ships web applications for real clients, from Laravel and React systems to business websites clients edit themselves.

EXPERIENCE

Freelance Web Developer — Sakka Travel **Sep 2026 – Present**

- Sole developer on a fixed-term contract for a Japan inbound travel company that sells to overseas travel agencies.
- Shipped the company's B2B website and partner inquiry workflow, working directly with the client and a designer.
- Developing an internal agent hub on Google Sites, built on the team's existing Google Drive and Sheets.

Full-Stack Developer Intern (OJT) — Pelozden RSS Inc. **Jul 2026 – Oct 2026**

- Worked full-stack on a production Laravel, Inertia and React rewrite of a legacy HR and workforce system.
- Built a core workflow module end to end, from database schema and backend services to the user interface.
- Built a shared component adopted across the platform, and reviewed and merged teammates' pull requests.
- Wrote automated tests for business-logic edge cases and interface regressions.

Student Aide — Holy Angel University (University Library, HAU Store) **Dec 2024 – May 2026**

SELECTED PROJECTS

Sakka Travel — B2B Website · *Astro, TypeScript, Wix, Wix Forms* **Client Project**

- Prototyped the site in Astro to the client's brand guidelines, then rebuilt it in Wix so their team edits it themselves.
- Routed partner inquiries to sales with Wix Forms and an email automation; fixed brand colors that failed WCAG.

Courtside — Court Booking System · *Laravel, React, TypeScript, MySQL* **Personal Project**

- Built a venue booking system with 15-minute GCash payment holds and a staff dashboard for receipts.
- Prevented double-booking in the database with a unique index on a generated column; 104 backend tests.

gastos — Offline-First Expense Tracker · *JavaScript, Vercel Serverless, PostgreSQL* **Personal Project**

- Fit about 32 API routes into 10 serverless functions to stay on a free hosting tier, with no changes to the API's URLs.
- Built an offline outbox with a service worker and IndexedDB that syncs when the connection returns.

WeePlay Therapy Center — Clinic Website · *HTML, CSS, JavaScript* **Client Project**

- Delivered a live, framework-free site for a pediatric therapy clinic: fast on low-end phones, fully keyboard-accessible.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Python, Java, SQL, HTML, CSS

Frontend: React, Next.js, Vue.js, Angular, Astro, Inertia.js, Tailwind CSS

Backend / Data: Laravel, Node.js, Express, REST APIs, JWT authentication, PostgreSQL, MySQL, MongoDB

Platforms / Tools: Vercel, Netlify, Wix, Git/GitHub, Postman, Figma, Pest, Claude Code

CERTIFICATIONS

IBM SkillsBuild: Make Agentic AI Work for You; Artificial Intelligence Fundamentals (2026)

Anthropic: AI Fluency: Framework & Foundations (2026)

freeCodeCamp: Back End Development and APIs; JavaScript Algorithms and Data Structures (2025); Responsive Web Design (2024)

Simplilearn: Design Thinking for Beginners; Introduction to PHP (2025); Introduction to Figma (2024)

Cisco Networking Academy: JavaScript Essentials 1 (2024) | **Coursera:** Work with Components in Figma (2024)

EDUCATION

Bachelor of Science in Information Technology — Holy Angel University, Angeles City **4th Year**

- Major in Web Development · Dean's Lister, 2023 – present
- Relevant coursework: Web Systems and Technologies, Mobile Programming, Object-Oriented Programming
